

EXPERIENCE, RESOURCES AND HARD WORK MAKE THIS HAPPEN.

### TRANSPORT

Using our own experience, or working with trusted partners, we move boats around the world by sea, road and shipping.

### OWNER SERVICES

Boats need people, paperwork and compliance to stay safe and legal. We manage it all so that you can spend your time enjoying the boat.

We take care of smaller vessels while you're away so you arrive confident they're ready for use.

### PROJECTS

We deliver or oversee all aspects of refit and repair – hull, rig, systems and machinery.

### DURING BUILD

Specs have consequences for later costs and use. We help define and implement what's right for you.

As UK Flag inspectors, we can help ensure a boat is built ready for UK-flag commercial use

### DELIVERY ACCEPTANCE

How many boats are delivered with snags? 100%. We use a tested procedure to identify them and protect your warranty.

With you or your captain during handover, we gain a deep knowledge of the complex machine that is your boat – to help look after it in future.

Baseline Yachts are surveyors quality-assured by YDSA and IIMS. Pre-purchase, insurance and damage surveys
